SUMMARY

Software Engineer with 5+ years of experience in full-stack development (React, Node.js, NestJS) and recent experience building AI agents for incident response and engineering prioritization. Skilled in Kafka, GCP, Jira and Temporal, with a focus on reliable, well-tested systems.

SKILLS & OTHER

Backend – Node.js, NestJS, Express.js, Python, Apache Kafka, Temporal, Socket.io, Camunda, SQL, PostgreSQL, MongoDB, Firebase

AI & Agents – LLM integration, AI agent workflows, Temporal, prompt design, GitHub Copilot, Cursor, Claude

Frontend – React JS, Redux, TypeScript, GraphQL, HTML, CSS, Tailwind CSS, MUI

Languages & Tools – JavaScript, Kotlin, Git, GitHub, GitLab, Jira, Docker, Jenkins, Vercel, GCP, Cypress, Jest

PROFESSIONAL EXPERIENCE

Calfus Pvt. Ltd. **Jun 2023 – Present**

Software Engineer

- Designed and delivered the KDL Auto-Remediation Agent on the internal **Aetherion** platform (**Python**, **Temporal**): detects errors and Kafka death loops in **GCP** logs, creates a **Jira** ticket, raises a fix PR for human review, and posts it to Microsoft Teams and Slack.
- Made the agent reliable with per-service YAML detection rules, deduplication to prevent duplicate tickets, and hourly caps on tickets and PRs; verified end to end against Jira and Temporal.
- Delivered the Daily Prioritization Agent, which turns a Jira dashboard or **JQL** query into a daily brief (Word document and email) using an explainable scoring model, with an **LLM** recommending ticket owners from the team's current workload and past work.
- Delivered **Kafka**-driven middleware services; diagnosed and resolved distributed race conditions using GCP logs.
- Led upgrades of core enterprise applications (**React** 16 to 19, **Node** 14 to 22), improving performance and security.
- Streamlined microfrontend flows for faster loading; optimized **Camunda** workflow re-triggering for high resiliency.
- Strengthened reliability with **Cypress** and **Jest** test suites; developed APIs and SQL queries and tuned slow queries (**SQL optimization**).
- Integrated **Twilio** and **WorkBright**, working with external teams on callback/webhook handlers.
- Delivered backend microservices in **NestJS** and **Kotlin**, translating client business needs into technical solutions.
- **Tech Stack:** JavaScript, TypeScript, React, Redux, Node.js, NestJS, Python, Temporal, Apache Kafka, GCP, Docker, Jenkins, Kotlin, GraphQL, Cypress, Jest.

Humanitus Pvt. Ltd. **Mar 2022 – Jun 2023**

Full Stack Developer

- Enhanced the CMS dashboard (scratch-card feature); fixed frontend and backend bugs; wrote test cases.
- Developed the UI with **React hooks** and **Redux**; created reusable, responsive components; led a new app version from scratch.
- Designed an analytics dashboard with **CleverTap** queries; built **Node.js** PDF generation and added Microsoft Clarity analytics in React.
- **Tech Stack:** JavaScript, TypeScript, React, Redux, Node.js, Express.js, GraphQL, Git, MUI, HTML, CSS, CleverTap.

Freelance Developer **Jan 2020 – Mar 2022**

Full-Stack Developer

- Delivered full-stack apps with **React JS** and **Node.js/Express.js** for a seamless user experience and efficient server-side rendering.
- Improved React performance using the **React Fiber reconciler** and developed scalable **RESTful APIs** for faster data retrieval.

EDUCATION

Masai School, Bangalore – Full Stack Web Development Jul 2021 – Feb 2022

Trinity College of Engineering, Pune – B.E. (First Class with Distinction) Jun 2014 – Jul 2018

CERTIFICATIONS

AWS Certified Cloud Practitioner – Amazon Web Services (AWS) Jul 2025

ACHIEVEMENTS & AWARDS

Second position in school, Matriculation Exams; Second Runner-up (Under 17), State Volleyball Championship, Maharashtra.

PROJECTS

Fitness Website – Fitness platform for gym services, membership plans, trainers, and classes.

Packaging & Printing Solutions Website – Responsive site for packaging and printing services and product catalogs.
